- Abdominoplasty

The Practice

Dr. Jim English is a facial plastic and cosmetic surgeon who has three board certifications and over 25 years of experience. His philosophy is to focus on the "complete person," and to determine the procedure that best achieves each patient's personal goal with the most excellent outcome possible.

Dr. English and his highly trained staff offer a full range of procedures in one complete, state-of-the-art medical facility. Because consultations, procedures and follow-up appointments take place in one location, all efforts are coordinated to maximize your care and convenience. Each appointment focuses on you as a person and reflects the mission of our practice.

We are committed to: Explaining procedures and options to ensure you have a firm understanding of the entire process; answering your questions in a thorough and respectful manner and helping increase your self-confidence through an improved, natural-looking appearance.
